

Foosball Live is a smart foosball game with automatic scoring and live audio/visual effects that is integrated with the internet and social media. Foosball Live can be enabled on a wide variety of Foosball Tables, with a simple DIY (Do-It-Yourself) kit from ThrowMotion, a leader in web-connected table games. The Foosball Live product has been tested extensively on various models of Tornado tables and is now available for order.

Features

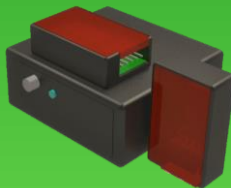

- Multiple game modes
- Automatic goal detection, ball speeds
- Live commentary, audio/visual effects
- Team selection, customization
- Stats tracking, leaderboards
- Tournaments, friends, social media
- Live dashboard, game usage info
